

Super-Fast Rectifiers

Features

- Provides efficient power switching
- Low reverse leakage current
- High surge current capability
- Low forward voltage drop
- Ideal for use as an output rectifier, freewheeling diode, or boost diode in HF applications
- Enhances system reliability and reduces downtime
- TO-247AD package

Benefits

Made for high-efficiency performance, these rectifiers provide minimal power loss and maximum versatility.

With up to 60A current capability, these components are ideal for power-intensive applications.

Applications

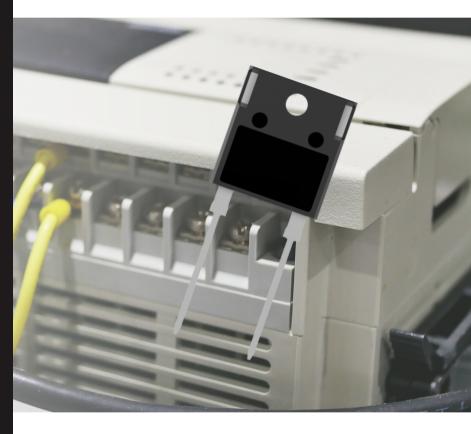

Ultrasonic Welders Switch Mode Power Supplies DC-DC Converters

Meet MCC's Super-Fast Recovery Rectifiers for Efficient High-Current Switching

Parametrics & Datasheets:

Product	Туре	Package	Voltage - DC Reverse (Vr) (Max)	Current - Average Rectified (Io)	Mounting Type	Datasheet
<u>MUR6040B</u>	Super-Fast Recovery Rectifier	TO-247AD	400V	60A	Through-Hole	<u>Info</u>
MUR3060BS	Super-Fast Recovery Rectifier	TO-247AD	600V	30A	Through-Hole	<u>Info</u>

Applications:

- Ultrasonic cleaners and welders
- Inductive heating and melting equipment

- Switch mode power supplies (SMPS)
- Voltage regulators
- DC-DC converters
- Motor controls

- Uninterruptible power supplies (UPS)
- Benchtop power supplies
- Power adapters
